ASSIGNMENT DAY 5

Operating System Installation and
Configuration.

TASK 1.

- ❖ On your Windows laptop or PC, open 'System Information' and take a screenshot showing your OS version, processor, and RAM details.

The screenshot shows the 'System Information' window in Windows. The left sidebar has 'System Summary' selected. The main area displays a table of system details.

Item	Value
OS Name	Microsoft Windows 11 Home Single Language
Version	10.0.26200 Build 26200
Other OS Description	Not Available
OS Manufacturer	Microsoft Corporation
System Name	YAGNIK
System Manufacturer	ASUSTeK COMPUTER INC.
System Model	ASUS TUF Gaming F15 FX507ZV4_FX507ZV4
System Type	x64-based PC
System SKU	
Processor	12th Gen Intel(R) Core(TM) i7-12700H, 2300 Mhz, 14 Core(s), 20 Logical Pro...
BIOS Version/Date	American Megatrends International, LLC. FX507ZV4.329, 14-10-2024
SMBIOS Version	3.5
Embedded Controller Version	0.83
BIOS Mode	UEFI
BaseBoard Manufacturer	ASUSTeK COMPUTER INC.
BaseBoard Product	FX507ZV4
BaseBoard Version	1.0
Platform Role	Mobile
Secure Boot State	Off
PCR7 Configuration	Elevation Required to View
Windows Directory	C:\WINDOWS
System Directory	C:\WINDOWS\system32
Boot Device	\Device\HarddiskVolume1
Locale	United States
Hardware Abstraction Layer	Version = "10.0.26100.1"
User Name	YAGNIK\RCB
Time Zone	India Standard Time
Installed Physical Memory (RAM)	16.0 GB
Total Physical Memory	15.6 GB
Available Physical Memory	8.12 GB
Total Virtual Memory	16.6 GB

Figure : System Information showing the OS version, Processor, and installed Ram details.

Explanation:

- ✓ I opened System Information (msinfo32) on my Windows laptop and verified the system details. The screenshot shows the OS version, processor, and installed RAM of my system.

TASK 2.

- ❖ Download any official Linux distribution ISO (like Ubuntu or Fedora), and use Rufus or BalenaEtcher to create a bootable USB drive for installation, If you don't have a spare USB, use a virtual machine tool like VirtualBox to mount the ISO and start the installation process virtually.

Figure : Downloading the Ubuntu ISO, creating a bootable USB using Rufus, and starting Ubuntu in VirtualBox.

Explanation :

- ✓ The image shows the complete Ubuntu installation process. First, the official Ubuntu 24.04.2 LTS ISO file is downloaded from the Ubuntu website. Next, the ISO file is selected in Rufus to create a bootable USB drive with the GPT partition scheme and UEFI target system. Finally, the

same ISO file is mounted in Oracle VirtualBox, where the Ubuntu installation screen opens successfully. This confirms that the bootable media is prepared correctly and the operating system is ready for installation.

TASK 3.

- ❖ On a macOS device (or using a macOS virtual machine), open 'System Preferences' and change the desktop wallpaper, then adjust the system language to Hindi or Gujarati, Find 'Language & Region' in System Preferences to add or change languages.

➤ Change the Desktop Wallpaper and Adjust the system Language in macOS.

🌈 Wallpaper Configuration :

Figure 1: Desktop wallpaper changed in macOS.

Explanation :

- ✓ The **Wallpaper** option was opened from **System Settings**, A new wallpaper was selected and applied successfully. The desktop background changed, confirming that the wallpaper was updated.

+ Language Configuration :

Figure 2: Hindi and Gujarati added in the Language & Region settings.

Explanation :

- ✓ The **Language & Region** option was opened from **System Settings**, Hindi and Gujarati were added to the Preferred Languages list, completing the language settings.

TASK 4.

- ❖ Install a fresh copy of Ubuntu Linux (real or virtual machine) and create a new user account named 'gamer'. After installation, enable automatic login for this user and take a screenshot of the login screen showing the username.

Figure : Ubuntu login screen displaying the gamer user account.

Explanation :

- ✓ A fresh installation of Ubuntu Linux was completed successfully. A new user account named gamer was created, and automatic login was enabled. The login screen displays the gamer user account, confirming that the system was configured successfully as required.

TASK 5.

- ❖ **Use ChatGPT to generate a step-by-step guide for installing Windows 10 on a laptop, including partitioning tips and post-installation settings for privacy and updates. Follow the guide and note any steps that were unclear or missing.**

➤ **Step by Step Guide for Installing Windows 10 on a Laptop :**

1. Preparing the Installation USB :

- ✓ First, download the official Windows 10 ISO file and create a bootable USB drive using tools like Media Creation Tool or Rufus. Make sure the USB drive has enough storage space before starting the process.

2. Booting from the USB Drive

- ✓ Insert the bootable USB drive into the laptop and restart the system. Open the Boot Menu by pressing the required key (such as F12, Esc, or F9 depending on the laptop model) and select the USB drive to begin the Windows installation.

3. Starting Windows Setup

- ✓ After booting from the USB, select the preferred language, time format, and keyboard layout. Then click on “Install Now” to start the installation process.

4. Selecting Installation Type

- ✓ Choose “Custom: Install Windows only (Advanced)” for a clean installation. This option allows you to manage disk partitions and install a fresh copy of Windows.

5. Partitioning the Drive

- ✓ Before making any changes to partitions, always take a backup of important data.
- ✓ Select the correct primary partition where Windows needs to be installed.
- ✓ For a new drive, create a new partition and allow Windows to automatically create required system partitions.
- ✓ Keep sufficient free storage space for future applications, updates, and personal files.

6. Completing the Installation

- ✓ Wait until Windows completes the installation process. After restarting, complete the initial setup by selecting the region, keyboard layout, connecting to the network, and creating a user account.

7. Configuring Privacy Settings

- ✓ After installation, review Windows privacy settings carefully. Disable unnecessary options such as unwanted location access, advertising ID, or extra diagnostic data sharing to improve privacy.

8. Installing Windows Updates

- ✓ Open Settings → Update & Security → Windows Update and check for available updates. Install all important updates and restart the laptop if required to keep the system secure and updated.

Steps That Were Unclear or Missing

- ✓ The guide explained the installation process properly. However, one unclear step was the Boot Menu key because it changes according to the

laptop manufacturer. Users should check their laptop model for the correct key before starting the installation.
