ASSIGNMENT DAY1

Overview of Computer Peripherals and
Their Connection Interfaces.

TASK 1.

- ❖ Create a table listing 3 types of printers, 2 types of scanners, and 2 types of webcams, and for each, write one real-life use case (for example: 'Inkjet printer – printing college assignments').

- The table below lists three types of printers, two types of scanners, and two types of webcams along with one real-life use case for each:

<u>Device</u>	<u>Type</u>	<u>Real Life Use Case</u>
Printer	Inkjet Printer	Printing college assignments and colour photos.
Printer	Laser Printer	Printing office documents in large quantity.
Printer	Dot Matrix Printer	Printing bills and receipts in shops.
Scanner	Flatbed Scanner	Scanning certificates and important documents.
Scanner	Sheet fed Scanner	Scanning multiple office documents quickly.
Webcam	Built in Webcam	Attending online classes and video meetings.
Webcam	External USB Webcam	Live streaming and high-quality video calls.

TASK 2.

- ❖ Draw a labeled diagram showing how a typical home printer connects to a laptop or PC, including the connection interface used (USB, Wi-Fi, or Bluetooth).

Figure : Labelled Diagram of a home Printer Connected to a Laptop Using USB, Wi Fi and Bluetooth.

Explanation :

- ✓ The above diagram shows how a home printer can be connected to a laptop or PC. A USB cable is used for a wired connection, while Wi-Fi and Bluetooth provide wireless connectivity. These connection methods allow the computer to send print jobs to the printer easily and efficiently.

TASK 3.

❖ **Create List three different connection interfaces (such as USB, Wi-Fi, Bluetooth) used by peripherals like printers, scanners, and webcams, and for each, name one advantage and one disadvantage, think about speed, convenience, and compatibility.**

➤ The table below shows three common connection interfaces used by peripherals such as printers, scanners, and webcams. It also includes one advantage and one disadvantage of each interface:

<u>Connection Interface</u>	<u>Advantage</u>	<u>Disadvantage</u>
USB	Provides a fast and stable connection.	Requires a USB cable.
WI FI	Allows wireless connection from anywhere within the network range.	Performance depends on the Wi-Fi signal.
Bluetooth	Easy to connect without using cables.	Works only over a short distance.

TASK 4.

- ❖ **Pick any one device you use at home or college (printer, scanner, or webcam). Write step-by-step instructions for how you would connect it to your computer, including what cable or wireless method you would use and any setup steps required.**

➤ **Device Chosen: Printer**

📌 The steps below explain how to connect a printer to a computer using a USB cable.

- ✓ Turn on the printer.
- ✓ Connect the printer to the computer using a USB cable.
- ✓ Wait for the computer to detect the printer.
- ✓ Install the printer driver if it is not installed automatically.
- ✓ Open Settings > Printers & Scanners and check that the printer is available.
- ✓ Print a test page to confirm that the printer is working properly.
