ASSIGNMENT DAY 4

Connecting and Testing Peripherals.

TASK 1.

- ❖ Connect a USB webcam to your computer, install any required drivers, and verify that the webcam works by opening the default camera app and capturing a photo.

Figure : USB Webcam Successfully Connected and Verified Using the Windows Camera App.

Explanation :

- ✓ The USB webcam was connected to the computer and the required driver was installed successfully. The Windows Camera app was opened to verify that the webcam was working correctly, and a photo was captured successfully.

TASK 2.

- ❖ Set up a local printer (USB or network), install the correct driver, and print a test page to confirm successful installation.

Figure : Local Printer Setup and Test Page.

Explanation :

- ✓ The local printer was connected to the computer using a USB cable. The correct printer driver was installed successfully. After the installation, a test page was printed to confirm that the printer was working properly. The successful test print shows that the printer is ready to use.

Summary :

- ✓ The printer was connected, the correct driver was installed, and the test page was printed successfully. This confirmed that the printer installation was completed successfully.

TASK 3.

- ❖ Take Simulate a connectivity issue by unplugging the printer's USB cable, then use Windows Device Manager to identify and resolve the 'printer not detected' problem, Check for error icons and use the 'Scan for hardware changes' option after reconnecting.

Figure : Resolving the "Printer Not Detected" Issue Using Device Manager.

Explanation:

1. I disconnected the USB cable from the printer to simulate a connectivity issue.
2. I opened Device Manager and checked the Print queues section.
3. The printer showed a warning icon, which indicated that it was not detected properly.
4. I reconnected the USB cable to the printer.
5. Then I clicked Action → Scan for hardware changes in Device Manager.
6. Windows detected the printer again, and the warning icon disappeared.
7. This confirmed that the printer was connected and working correctly.

Summary:

- ✓ The printer connectivity issue was resolved by reconnecting the USB cable and using Scan for hardware changes in Device Manager. The printer was detected successfully and started working normally again.
- Explanation:

TASK 4.

- ❖ A user reports that their webcam video is not displaying in Zoom, but it works in the default camera app. Troubleshoot and resolve the issue so the webcam works in both applications, Check if another app is using the webcam or if Zoom permissions are enabled.

Figure : Troubleshooting the webcam issue by verifying Zoom camera settings and Windows camera permissions.

Explanation :

1. Opened Zoom Settings → Video.
2. Selected the correct USB HD Webcam.

3. Opened Windows Settings → Privacy & Security → Camera.
4. Verified that Camera access and Let desktop apps access your camera were turned ON.
5. Closed any application that might already be using the webcam.
6. Restarted Zoom and checked the camera preview.
7. Confirmed that the webcam worked correctly in both Zoom and the Windows Camera app.

Summary :

- ✓ The webcam issue was resolved by enabling camera permissions, selecting the correct webcam in Zoom, and making sure no other application was using the camera. After these steps, the webcam worked successfully in both Zoom and the Windows Camera app.
